

BECOME AN ARIS CERTIFIED BUSINESS PROCESS ADMINISTRATOR

Earn the recognition you deserve

Are you the kind of person who doesn't stop at merely performing your daily tasks? Do you continue to expand your knowledge to be the best you can be? Then becoming a Software AG ARIS Certified Business Process Administrator is the next essential step in your career. You can register online for the test at: www.softwareag.com/certification.

Objectives and benefits

Software AG is the global leader in business processes, integration and big data. Our more than 40 years of innovation include the invention of:

- The first business process analysis platform, ARIS
- The first high-performance transactional database, Adabas
- The first B2B server and SOA-based integration platform, webMethods
- Pioneering big data technology and streaming analytics solutions

You can leverage the opportunities created by the four forces of mobile, social, cloud and big data with Software AG's Digital Business Platform of tightly integrated products for business process & IT transformation, analytics & decisions, process, integration and in-memory data.

The Software AG Certification Program establishes a standard of knowledge and skills necessary to successfully set up, customize and drive business process excellence projects with Software AG technology. All certifications offered by Software AG attest to a high level of proficiency as a process expert.

Benefits of becoming an ARIS Certified Business Process Administrator are:

- Industry recognition of your knowledge and proficiency
- Validation of your expertise and skills to your employer
- Ability to apply for future job opportunities
- Logo and certificate to identify you as a Software AG Certified Professional
- Best way to prepare for the test

Test structure

The certification test is practice-oriented and simulates situations typical for business process administration. It tests your ARIS knowledge in all areas that are important for usage, customization and management of your ARIS modeling environment.

The ARIS Business Process Administrator certification test is a Web-based multiple-choice test. This proctored examination is designed for the experienced ARIS user. It consists of about 50 multiple choice questions, which cover a range of ARIS methodology, client and server topics. To pass the test and receive certification, you must score a 66% on the test within 180 minutes. The exact numbers in effect for a test may change at short notice and will be displayed in the test.

ARIS Business Process Administrator Certification currently applies for ARIS 9.x. The current version 2.0 of the test covers several aspects of ARIS. All covered aspects and products are listed in section "Prerequisites and Dependencies" of this document.

No course completion is required to sit for this exam, but prospective examinees are strongly recommended to have completed the courses: "Business Process Modeling with ARIS" and "Advanced Business Process Modeling and Administration with ARIS".

Test content

Individuals who become ARIS Certified Business Process Administrators will have demonstrated knowledge and skills associated with the following subject areas:

- **ARIS BPA project**
Project topics
- **Modeling**
Modeling basics (how to use ARIS), modeling conventions, entry and library models, variants, generating models
- **Versioning**
Versioning topics
- **Quality Assurance**
Backup and restore, reorganization, consolidation, semantic checks
- **Import and export**
Import and export topics
- **Evaluations**
Evaluation basics and commons, queries, reports and macros
- **Database setup**
Technical set-up of the database, group structure, level concept and model architecture, user management, access privileges management, LDAP integration
- **Configuration**
Convention manual, method configuration, creating and managing filters, font formats and languages, creating and managing templates

Prerequisites and dependencies

The test assumes a general understanding of Business Process Management/Business Process Analysis.

The questions cover the following ARIS 9.5 products: ARIS Designer/Architect, ARIS Design/Connect Server.

This test is designed to check for skills and understanding of customization and management of an ARIS modeling environment.

Preparation guidelines

Successful completion of the ARIS Business Process Administrator certification test requires a solid knowledge in using ARIS products as can be acquired through Software AG training courses plus practical experience.

While the suggested resources can assist you in preparing for the test, it is imperative that you have hands-on experience in modeling processes as well as customizing and managing the modeling environment.

Product documentation

For topics covered in the test, please review the ARIS Platform documentation delivered with your ARIS installation files.
