

BECOME AN APAMA CERTIFIED SOLUTION DEVELOPER

Earn the recognition you deserve

Are you the kind of person who doesn't stop at merely performing your daily tasks? Do you continue to expand your knowledge to be the best you can be? Then becoming a Software AG Apama Certified Solution Developer is the next essential step in your career. You can register online for the test at: www.softwareag.com/certification.

Objectives and benefits

Software AG is the global leader in business processes, integration and big data. Our more than 40 years of innovation include the invention of:

- The first business process analysis platform, ARIS
- The first high-performance transactional database, Adabas
- The first B2B server and SOA-based integration platform, webMethods
- Pioneering big data technology and streaming analytics solutions

You can leverage the opportunities created by the four forces of mobile, social, cloud and big data with Software AG's Digital Business Platform of tightly integrated products for business process & IT transformation, analytics & decisions, process, integration and in-memory data.

The Software AG Certification Program establishes a standard of knowledge and skills necessary to successfully set-up, customize and drive business process excellence projects with Software AG technology. All certifications offered by Software AG attest to a high level of proficiency as a process expert.

Benefits of achieving the Apama Certified Solution Developer certification are:

- Industry recognition of your knowledge and proficiency
- Validation of your expertise and skills to your employer
- Ability to apply for future job opportunities
- Logo and certificate to identify you as a Apama Certified Solution Developer
- Best way to prepare for the test

Test structure

The Apama Certified Solution Developer certification is done Web-based as a multiple-choice test. This proctored examination is designed for the experienced Apama solution developer who writes, tests, debugs and maintains software solutions; prepares application components for deployment; and may also be responsible for software product definition, requirements analysis, specifications, and choice of application architecture and design. The test consists of about 60 multiple choice questions, which cover a range of Apama development topics. To pass the test and receive certification, you must score a 66% on the test within 180 minutes. The exact numbers in effect for a test may change at short notice and will be displayed in the test.

Preparation guidelines

Successful completion of the Apama Certified Solution Developer test requires a solid knowledge in Apama as can be acquired through Software AG training courses plus practical experience.

While the suggested resources can assist you in preparing for the test, it is imperative that you have hands-on experience in developing applications with Apama EPL.

Product documentation

For topics covered in the test, please review the Apama documentation delivered with your Apama installation files.

Test content

Individuals who successfully complete the Apama Certified Solution Developer test will have demonstrated knowledge and skills associated with the following subject areas:

- **Overview**
Apama Studio, Correlator, Integration topics
- **EPL**
Events, Monitors, Actions, Streams, General Programming, DataViews, Spawning, Parallel Processing, Storing Data, Error Checking, ApamaDoc

Prerequisites and dependencies

The scope of the test is Apama 5.1. The test is designed to test for skills in developing an Apama EPL Application using the Apama Studio development environment.

Related Software AG training courses

Software AG offers a variety of training courses and workshops offered by local Software AG offices around the world.

No course completion is required to sit for this exam, but prospective examinees are strongly recommended to have completed the courses:

- Apama Overview
- Developing an Apama EPL Application

ABOUT SOFTWARE AG
